

What Makes Us Special - Four C's of a Quality Dance Studio

What makes Kristi's Academy of Dance Special...

1. Cost

We all work hard for our money and can appreciate a good value. We know that you want your child to receive the best education without breaking the bank. We strive to offer quality dance instruction at a wonderful price, and as a staff we make every effort to keep your costs low so your child can continue to pursue their arts education with us, worry-free.

2. Curriculum

Our qualified staff is dedicated to pursuing excellence in education and passing that on to our students. We all pursue furthering our educations through Master training, DEA membership, Stunt /Tumbling Safety Certifications and taking technique and teaching classes to better serve you. We are committed to providing quality dance, cheer and tumbling education in a supportive, loving, and friendly environment. Our students learn the art and discipline of dance, acrobatics and cheerleading including proper technique, correct terminology, class etiquette, appreciation of the arts, teamwork, time management, performance qualities, dance history, audition and interview skills, and clear communication skills.

Our values solidify our strong belief in age appropriate dance movements, song lyrics, and costume selections. We want everyone to feel appreciated, accepted, and a part of THE KAD FAMILY.

3. Convenience

We offer many advantages including a two convenient locations, a wide selection of class offerings and time choices, a flexible make up policy for missed classes . We have recently added: online registration and payment options!

4. Creativity

We believe that creativity is very important and fosters a sense of self in several ways, so we focus on building a creative environment in all our activities. Whether you are involved in our performances, camps, classes, or master classes, there is a focus on creative and critical thinking. Our students are encouraged to apply a personal style to their technique, work on characterizations for performing, learn improvisational skills in master classes and weekly classes, and most importantly, all our students learn how to appreciate and nurture each others' creative efforts, so there is a sense of safety and community in creation.
